

A NEW SERVICE FROM BULLOCK CONSULTING SOLUTIONS

Know what you can safely do next.

The shape of the picture

Revenue Overdrive connects pipeline, receivables, payroll, and tax reserves into one live cash position, so you can pressure-test a hire or a big purchase before it touches cash on hand.

A live view connecting what you're owed, what's actually in the bank, and what you can safely commit to next.

What you'll get

- **Safe-to-spend cash**
Bank balance minus payroll, tax reserves, and committed payables, so the figure you see is the one you can act on.
- **Early warning signals**
Reserve coverage and customer concentration, flagged in plain language before they become a Monday-morning problem.
- **Entity-aware guidance**
Wording and math that match your entity type and federal tax treatment, from sole proprietor to C corp.
- **Decision briefs, not dashboards**
A one-page yes-or-no on a hire, purchase, or spend, with the assumptions written down next to the number.

Plus a running set of cash signals tuned to your business, explained in plain language as they're set up, not buried in a dashboard.

Deterministic, not AI guesswork

Every number traces back to something you entered. Same inputs, same answer, every time. This is planning support, not tax, legal, accounting, or investment advice.
